

RDUK TRAINING PROGRAM OUTLINE

INTRODUCTION

This Program has been specifically designed by Reach Dem UK (RDUK) to give young persons the opportunity to learn about working towards their goals and aspirations, by developing life skills whilst supporting their communities. Our aims and objectives are to provide informal education and training which would provide a conduit to establishing realizable career paths thus creating greater employability, whilst also developing their personal health and wellbeing as an integral factor to achieving realistic goals and aspirations. Our target group is 16 year old and older BMEs, and our geographical area is currently South London.

AIMS

To provide a user lead opportunity for young people to decide at which segment of the program they engage. It provides a new way forward in self- development by allowing them to identify what they need to improve their options and move toward achieving greater access to their career paths.

To provide a unique opportunity to stand up and be recognized as service users, who have a say in what type of training or workshop is delivered.

OBJECTIVES

To enable young people to become leaders, self-reliant, explorative, community focused, passionate about achievements, development of entrepreneurial skills, gain a wider access to information and life skills necessary to enter into the higher educational ladder to gain qualifications to assist them in pursuing their goals.

Assisting young people to identify areas of weakness, simultaneously enhancing their self- esteem and confidence by positive affirmations, as opposed to focusing on weaknesses.

SUPPORT

As a young person starts our Program support begins. RDUK will provide support during their training, extended guided learning, provide follow up after-care which will consist of ongoing mentoring covering advice and counseling and build sustainable bridges within the community in which they live. Provide proactive role models who will undertake to follow the progress of individuals.

STRUCTURE

This Program comprises a Nine week schedule covering a variety of workshops designed to develop and enhance the knowledge, skills and experiences of young persons .

It is important to note that the structure has been designed with service users in mind. They decide which sessions or workshops are applicable to their needs (after a pre-registration initial assessment) undertaken during a fixed 9 week time frame.

This program is specifically marketed to young people who are not in employment, training or further education.
